ESTABLISH NEW TYPE OF AGRICULTURAL LYCEUM

4-YEAR COURSE OFFERED -- Warsaw Trybuna Ludu, No 168, 20 Jun 50

Schayer, Director of Agricultural Education of the Ministry of Agriculture and Agrarian Reform, announced that present agricultural lyceums will be changed during the academic year 1950-51 to 4-year agricultural lyceums. Students will be trained in zootechnology, agrotechnology, agricultural accountancy, gardening, fishing, and beekeeping. The first 3 years at the lyceums will be devoted to theoretical studies, followed by 8 months of practice at PGR (State Farms), POM (State Agricultural Machine Centers), cooperatives, etc. The students then will return to the lyceums to take their examinations. Graduate students will be sent to various agricultural enterprises. Outstanding graduates will be given the choice of continuing advance studies in schools of higher education.

New 2-year agricultural lyceums will also be established for young agricultural workers and adults who wish to improve their qualifications. During the 1950-51 academic year, 140 4-year and 2-year agricultural lyceums will be operating. Registration for the new-type agricultural lyceums opened on 15 June.

A candidate must have completed 7 years in an elementary school to be admitted to a 4-year lyceum.

Youths on the job, adults, graduates of type-I lyceums, students who completed 9 years in elementary schools, and graduates of agricultural high schools may be admitted to the 2-year lyceums.

AGRICULTURAL TECHNICIANS ON INCREASE -- Warsaw Gazeta Pomorska, No 152, 4 Jun 50

Approximately 1,900 students will graduate from grade I and II agricultural lyceums in June 1950, 1,500 of them from grade II lyceums. All graduates will receive the title of agricultural technician and will be sent immediately to agricultural institutions and centers. Approximately 600 of the 1,500 graduates of 4-year lyceums will be employed by SOM (State Machine Centers) as junior agronomists.

STATE LYCEUM OF AGRICULTURAL MECHANIZATION -- Warsaw Gazeta Pomorska, No 152,
4 Jun 50

Approximately 90 young students attend the State Lyceum of Agricultural Mechanization in Gronowo. There are five such schools in Poland. After the April 1950 reorganization, a 4-year course was introduced in these lyceums open to students with 7 years of elementary schooling. The Gronowo lyceum prepares students for the following positions: technical inspectors, technical clerk-supervisors in machine centers, machine center managers, mechanization managers at PGR, technical managers in repair shops at TOR, PGR, POM, and SOM repair shop managers, regional machinery inspectors, mechanization clerk-supervisors in central and regional administrations of PGR, TOR, and POM.

In June 1950, 170 students will graduate from these five lyceums. This number is far too small to satisfy the demand for skilled help. The Central Administration of PGR alone has asked for 760 graduates. During the 1950-51 academic year, the Ministry of Agriculture and Agrarian Reform will open four more lyceums of this type.

STATE MACHINE CENTERS SCHOOL ESTABLISHED -- Warsaw Express Wieczorny, No 162,
14 Jun 50

A Central School of the State Machine Centers and Producers' Cooperatives is being organized on a 30-hectare tract adjoining the former palace of Ursyn Julian Niemcewicz in Ursynowo.

The tract has been divided into a training and farming center. Two school buildings for 600 students are under construction and five buildings to house trainees. Two new wings will be added. An athletic field, a swimming pool, a large amphitheater, and other sport and cultural facilities will be available. A central boiler room is under construction to heat all buildings. The laundry, kitchen, and lunchroom will be located nearby.

Practically all of the 23 planned model homes in the farming center have been erected.

The homes will be occupied by agricultural workers, instructors of the training center, and administration officials.
